Subject Index of Volume 29

Adsorption
low temperature CO_2, on metal oxides: spectroscopic characterisation of some weakly adsorbed species, 425
Alkynes
perpendicular *vs.* parallel alkynes, monohapto *vs.* dihapto vinyls, aromatic *vs.* non-aromatic heterocycles: access to different types of bonding of these ligands in clusters, 323
Aluminium
potential for molecular dynamics simulations of structural and dynamic properties of hydrate aluminosilicates, 357
Amorphous carbon supports
evidence of stabilising interaction between transition metal carbonyl clusters and; analytical electron microscopy of clusters, 467
Aromatic
perpendicular *vs.* parallel alkynes, monohapto *vs.* dihapto vinyls, aromatic *vis.* non-aromatic heterocycles: access to different types of bonding of these ligands in clusters, 323

Bonding modes
adopted by organo-fragments on metal cluster surfaces, 307

Carbonyl
analytical electron microscopy of clusters; evidence of stabilising interaction between transition metal carbonyl clusters and amorphous carbon supports, 467
production of Ni–Ru bimetallic catalysts and materials by thermal and chemical decomposition of tetranuclear bimetallic carbonyl cluster, 251
surface organometallic chemistry: molecular approach to heterogeneous catalysis and new perspective for synthesis of metal carbonyl clusters, 191
synthesis and characterisation of heterometallic, cluster anions, 211
Catalysis
surface organometallic chemistry: molecular approach to heterogeneous catalysis and new perspective for synthesis of metal carbonyl clusters, 191
Catalysts
bimetallic, derived from heteronuclear cluster; CO hydrogenation and olefin hydroformylation on Rh–Mo/SiO_2 catalysts, 503
coupling effects in IR spectra from supported metal catalysts, 235
EXAFS studies of pillared clay catalysts, 201
heterogeneously catalysed cyclisation reactions of thyne over single crystal Pd and Pd catalysts, 105
multitechnique analytical characterisation of isomerisation catalyst $Ir_4(CO)_{12}$ on silica, 405
production of Ni–Ru bimetallic catalysts and materials by thermal and chemical decomposition of tetranuclear bimetallic carbonyl cluster, 251
tool for surface science investigation of oxide catalysts; chemistry of olefins at metal oxide surfaces, 175
XPS study on Ru compounds and catalysts, 297
Catalytic system
chemical and physical interactions between metal and oxidic supports in, 65
Chemical and physical interactions
between metal and oxidic supports in catalytic system, 65
Chemisorption
and oxidative interactive of trimethylamine on Ru/TiO, 387
Chromium
$CO_2$and N_2O complexes of Cr(II) supported on silica, 369
time-resolved FTIR study of interaction of $Cr(CO)_6$ with α-Cr_2O_3, 347

Clay
EXAFS studies of pillared clay catalysts, 201
Clusters
analytical electron microscopy of; evidence of stabilising interaction between transition metal carbonyl clusters and amorphous carbon supports, 467
bi-dimensional CO, at surface of polycrystalline monoclinic ZrO_2, 457
bimetallic catalysts derived from heteronuclear cluster; CO hydrogenation and olefin hydroformylation on $Rh–Mo/SiO_2$ catalysts, 503
bonding modes adopted by organofragments on metal cluster surfaces, 307
and colloid-bridges between molecular and condensed materials, 133
CO, on MgO studied by low-temperature UV-visible diffuse reflectance spectroscopy, 489
dynamic processes in crystals of transition metal clusters, 165
from clusters and surfaces to clusters on surfaces: opening toward surface organometallic chemistry, 5
high nuclearity, and beyond, 83
interplay between bridging groups and metal–metal bonds in heterometallic clusters, 33
introduction to 1991 Turin Workshop on 'Clusters and Surfaces', 1
metal-metal bonding network in tetranuclear planar clusters, 245
perpendicular *vs.* parallel alkynes, monohapto *vs.* dihapto vinyls, aromatic *vs.* non-aromatic heterocycles: access to different types of bonding of these ligands in clusters, 323
production of Ni–Ru bimetallic catalysts and materials by thermal and chemical decomposition of tetranuclear bimetallic carbonyl cluster, 251
relativistic, 419
similarities and differences between cluster compounds of d and f metals, 143
surface organometallic chemistry: molecular approach to heterogeneous catalysis and new perspective for synthesis of metal carbonyl clusters, 191
synthesis and characterisation of heterometallic carbonyl cluster anions, 211
synthesis and spectroscopic characterisation of $[Fe_4P(CO)_{13}H_{m-n}]^{n-}$ ($m=3$, $n=0$, 1, 2, 3; $m=2$, $n=2$) clusters: crystal structure of $[PPh_4]_2[Fe_4P(CO)_{13}H]$, 395
CO
bi-dimensional, clusters at surface of polycrystalline monoclinic ZrO_2, 457
clusters on MgO studied by low-temperature UV-visible diffuse reflectance spectroscopy, 489
dimeric species, novel, produced by CO interaction with surface F-type centres on Mg-doped MgO: IR study, 437
CO_2
end-on surface coordinated (adsorbed): specific ligand for surface Lewis acidic centres, 447
low temperature, adsorption on metal oxides: spectroscopic characterisation of some weakly adsorbed species, 425
and N_2O complexes of Cr(II) supported on silica, 369
Colloid-bridges
and clusters between molecular and condensed materials, 133
Coupling effects
in IR spectra from supported metal catalysts, 235
Crystals
bi-dimensional CO clusters at surface of polycrystalline monoclinic ZrO_2, 457
dynamic processes in, of transition metal clusters, 165
EPR study on formation of superoxide radical ion on monoclinic zirconia, 379
heterogeneously catalysed cyclisation reactions of thyne over single crystal Pd and Pd catalysts, 105
synthesis and spectroscopic characterisation of $[Fe_4P(CO)_{13}H_{m-n}]^{n-}$ ($m=3$, $n=0$, 1, 2, 3; $m=2$, $n=2$) clusters: crystal structure of $[PPh_4]_2[Fe_4P(CO)_{13}H]$, 395
Cyclisation
heterogeneously catalysed, reactions of thyne over single crystal Pd and Pd catalysts, 105

Decomposition
thermal and chemical; production of Ni–Ru bimetallic catalysts and materials by, of tetranuclear bimetallic carbonyl cluster, 251
Dynamic processes
in crystals of transition metal clusters, 165
Dynamic properties
potential for molecular dynamics simulations of structural and dynamic properties of hydrate aluminosilicates, 357

Electrochemistry
organometallic; some aspects of, 117
Ethyne
heterogeneously catalysed cyclisation reactions of thyne over single crystal palladium and palladium catalysts, 105

Hydroformylation
olefin, and CO hydrogenation on Rh–Mo/SiO_2 catalysts; bimetallic catalysts derived from heteronuclear cluster, 503
Hydrogenation
CO, and olefin hydroformylation on Rh–Mo/SiO_2 catalysts; bimetallic catalysts derived from heteronuclear cluster, 503

Iridium
multitechnique analytical characterisation of isomerisation catalyst $Ir_4(CO)_{12}$ on silica, 405
Iron
interaction between Fe(III) oxide and Ti(IV) oxide at elevated temperatures, 475
synthesis and spectroscopic characterisation of $[Fe_4P(CO)_{13}H_{m-n}]^{n-}$ ($m=3$, $n=0$, 1, 2, 3; $m=2$, $n=2$) clusters: crystal structure of $[PPh_4]_2[Fe_4P(CO)_{13}H]$, 395
Isomerisation
multitechnique analytical characterisation of, catalyst $Ir_4(CO)_{12}$ on silica, 405

Lewis acidic centres
surface: specific ligand for; end-on surface coordinated (adsorbed) CO_2, 447

Magnesium
CO clusters on MgO studied by low-temperature UV-visible diffuse reflectance spectrocopy, 489
dimeric species, novel, produced by CO interaction with surface F-type centres on Mg-doped MgO: IR study, 437
Metallocenes
interaction of, with oxidic surfaces, 261
Metal–metal bonding network
in tetranuclear planar clusters, 245
Metal–metal bonds
interplay between bridging groups and, in heterometallic clusters, 33
Microscopy
analytical electron, of clusters; evidence of stabilising interaction between transition metal carbonyl clusters and amorphous carbon supports, 467
Molecular and condensed-bridges
clusters and colloid-bridges between, 133
Molybdenum
bimetallic catalysts derived from heteronuclear cluster; CO hydrogenation and olefin hydroformylation on Rh–Mo/SiO_2 catalysts, 503

Nickel
production of Ni–Ru bimetallic catalysts and materials by thermal and chemical decomposition of tetranuclear bimetallic carbonyl cluster, 251
Nitriles
shape-selective binding of, to inorganic cavitand, $V_{12}O_{32}^{4-}$, 97
Nitrous oxide complexes
CO_2 and, of Cr(II) supported on silica, 369

Olefins
bimetallic catalysts derived from heteronuclear cluster; CO hydrogenation and olefin hydroformylation on Rh–Mo/SiO_2 catalysts, 503
chemistry of, at metal oxide surfaces: tool for surface science investigation of oxide catalysts, 175
Organometallic chemistry
surface: molecular approach to heterogeneous catalysis and new perspec-

tive for synthesis of metal carbonyl clusters, 191
surface: opening toward; from clusters and surfaces to clusters on surfaces, 5
Organometallic electrochemistry
some aspects of, 117
Organometallic systems
IR intensities and frequencies of vibrational modes of C_2H_4 unit in, 333

Palladium
heterogeneously catalysed cyclisation reactions of thyne over single crystal Pd and Pd catalysts, 105
Phosphorus
high resolution ^{31}P solid state NMR in P–transition metal compounds, 221
synthesis and spectroscopic characterisation of $[Fe_4P(CO)_{13}H_{m-n}]^{n-}$ ($m=3$, $n=0$, 1, 2, 3; $m=2$, $n=2$) clusters: crystal structure of $[PPh_4]_2[Fe_4P(CO)_{13}H]$, 395

Rhodium
bimetallic catalysts derived from heteronuclear cluster; CO hydrogenation and olefin hydroformylation on Rh–Mo/SiO_2 catalysts, 503
Ruthenium
chemisorption and oxidative interactive of trimethylamine on Ru/TiO_2, 387
production of Ni–Ru bimetallic catalysts and materials by thermal and chemical decomposition of tetranuclear bimetallic carbonyl cluster, 251
XPS study on Ru compounds and catalysts, 297

Silicon
bimetallic catalysts derived from heteronuclear cluster; CO hydrogenation and olefin hydroformylation on Rh–Mo/SiO_2 catalysts, 503
CO_2 and N_2O complexes of Cr(II) supported on silica, 369
modelling the interaction of molecules with silica surface hydroxyl: overview, 287
multitechnique analytical characterisation of isomerisation catalyst $Ir_4(CO)_{12}$ on silica, 405
potential for molecular dynamics simulations of structural and dynamic properties of hydrate aluminosilicates, 357
Spectroscopy
CO clusters on MgO studied by low-temperature UV-visible diffuse reflectance spectrocopy, 489
coupling effects in IR spectra from supported metal catalysts, 235
dimeric species, novel, produced by CO interaction with surface F-type centres on Mg-doped MgO: IR study, 437
EPR study on formation of superoxide radical ion on monoclinic zirconia, 379
EXAFS studies of pillared clay catalysts, 201
high resolution ^{31}P solid state NMR in P–transition metal compounds, 221
IR intensities and frequencies of vibrational modes of C_2H_4 unit in organometallic systems, 333
low temperature CO_2 adsorption on metal oxides: spectroscopic characterisation of some weakly adsorbed species, 425
synthesis and spectroscopic characterisation of $[Fe_4P(CO)_{13}H_{m-n}]^{n-}$ ($m=3$, $n=0$, 1, 2, 3; $m=2$, $n=2$) clusters: crystal structure of $[PPh_4]_2[Fe_4P(CO)_{13}H]$, 395
time-resolved FTIR study of interaction of $Cr(CO)_6$ with α-Cr_2O_3, 347
XPS study on Ru compounds and catalysts, 297
Superoxide radical ion
EPR study on formation of, on monoclinic zirconia, 379
Surfaces
bi-dimensional CO clusters at surface of polycrystalline monoclinic ZrO_2, 457
bonding modes adopted by organo-fragments on metal cluster surfaces, 307
chemistry of olefins at metal oxide surfaces: tool for surface science investigation of oxide catalysts, 175
dimeric species, novel, produced by CO interaction with surface F-type centres on Mg-doped MgO: IR study, 437
effect of form on surface chemistry of finely divided solids, 153

end-on surface coordinated (adsorbed) CO_2: specific ligand for surface Lewis acidic centres, 447
from clusters and surfaces to clusters on surfaces: opening toward surface organometallic chemistry, 5
interaction of metallocenes with oxidic surfaces, 261
introduction to 1991 Turin Workshop on 'Clusters and Surfaces', 1
modelling the interaction of molecules with silica surface hydroxyl: overview, 287
mono-and poly-nuclear species of V on TiO_2 (anatase) surface, 271
surface organometallic chemistry: molecular approach to heterogeneous catalysis and new perspective for synthesis of metal carbonyl clusters, 191
Synthesis
and characterisation of heterometallic carbonyl cluster anions, 211
molecular approach to heterogeneous catalysis and new perspective for, of metal carbonyl clusters; surface organometallic chemistry, 191
synthesis and spectroscopic characterisation of $[Fe_4P(CO)_{13}H_{m-n}]^{n-}$ ($m=3$, $n=0$, 1, 2, 3; $m=2$, $n=2$) clusters: crystal structure of $[PPh_4]_2[Fe_4P(CO)_{13}H]$, 395

Titanium
chemisorption and oxidative interactive of trimethylamine on Ru/TiO_2, 387
interaction between Fe(III) oxide and Ti(IV) oxide at elevated temperatures, 475
mono- and poly-nuclear species of V on TiO_2 (anatase) surface, 271
Transition metal
analytical electron microscopy of clusters; evidence of stabilising interaction between transition metal carbonyl clusters and amorphous carbon supports, 467
dynamic processes in crystals of transition metal clusters, 165
high resolution ^{31}P solid state NMR in P–transition metal compounds, 221
Trimethylamine
chemisorption and oxidative interactive of, on Ru/TiO_2, 387

Vanadium
mono- and poly-nuclear species of, on TiO_2 (anatase) surface, 271
shape-selective binding of nitriles to inorganic cavitand, $V_{12}O_{32}^{4-}$, 97
Vibrational modes
IR intensities and frequencies of, of C_2H_4 unit in organometallic systems, 333
Vinyls
perpendicular *vs.* parallel alkynes, monohapto *vs.* dihapto vinyls, aromatic *vs.* non-aromatic heterocycles: access to different types of bonding of these ligands in clusters, 323

Zirconium
bi-dimensional CO clusters at surface of polycrystalline monoclinic ZrO_2, 457
EPR study on formation of superoxide radical ion on monoclinic zirconia, 379
